Abolajiopeyemi000@gmail.com Lagos

PROFILE

Highly motivated and detail-oriented MERN Full-Stack Developer with experience in building scalable and responsive web applications. Proficient in MongoDB, Express.js, React.js, and Node.js, with a passion for developing innovative solutions and continuously improving code quality. Adept at collaborating with cross-functional teams and implementing best practices in software development. Additionally, possesses basic knowledge of blockchain technology, including how decentralized networks operate and the fundamentals of smart contracts and cryptocurrencies.

Experience

Software Developer
DLT Africa
https://dltafrica.io/

JUN 2022- Present

- Developed and maintained DLT Africa products, enhancing user experience and performance through innovative solutions and
- best practices.
- Utilized a variety of technologies and frameworks including [JavaScript, React, Nextjs, Node.js, etc.].
- Participated in various mentorship and training programs, focusing on aspiring web developers. This involved creating curricula
- and leading workshops designed to foster practical skills and industry knowledge.
- Developed and implemented user-friendly features for internal web applications, increasing user engagement by 20%.
- Collaborated on a project to refactor the company's main web application, resulting in a 15% improvement in load time.
- Contributed to the maintenance of the website, fixing more than 50 bugs and improving site reliability.
- Collaboarated effectively within cross-functional teams, demonstrating communication skills to ensure alignment on both ends of
- the teams.

Technical Ambassador
Lisk Africa
https://lisk.com/

Mar 2024- Nov 2024

- Collaborated in hosting physical meetups, workshops, and online hackathons to promote Lisk blockchain technology in Nigeria
- and Kenya.
- Engaged with the Lisk community through forums, social media, and direct communication to provide technical support and
- gather feedback.
- Collaborated with global Lisk Ambassadors to share best practices and coordinate efforts in growing the Lisk ecosystem.
- Represented Lisk Africa at various blockchain events, increasing visibility and awareness of the platform.

Projects

- Kara

Kara is a decentralized marketplace which will be designed to simplify and secure the process of trading real life goods and services
leveraging cryptocurrency and blockchain technology.
- Strategic Vision & Leadership: Spearheaded the conceptualization and strategic direction of Kara.
- Technical Architecture Design: Designed and oversaw the implementation of Kara's technical architecture

- Spendsmart

Spendsmart is an expense tracker which allows you to track every expense you made both credit and debit expense so you can be more accountable about your spendings.
- Applied my proficiency in morden programming languages and design tools like React.js, Tailwind CSS, and Figma to design and
- develop the web application, enhancing user experience and interaction.
- Contributed to the UI/UX design and prototyping
- Contributed in the backend by implementing the Expense and User controller , Set all the Expense and User Routes and confirm its functioning seamlessly

- Hostel Management sysyem

The hostel management project helps manage all the hostel users and give the power to an admin to add or remove a user, can manage all the amounts of all the users in each hostel rooms.. it can be implemented in every schools and academy with hostels
- Utilized Node.js and Express.js to an optimized level to build the entire backend of the project
- Contributed in designing the some front end components like the AdminPreview, studentDashBoard, student and admin register components
- Adopted a security oriented mindset by evaluating systems from both attacker and defender perspective to strengthen system resilience

Education

B.Tech Civil Engineering   2011-2018

**LADOKE AKINTOLA
UNIVERSITY OF
TECHNOLOGY**

Technical Skills

Front-End: React.Js, HTML5, CSS3, JavaScript (ES6+), Tailwind CSS
Back-End: Node.js, Express.js
Database: MongoDB, Mongoose
Blockchain: Basic understanding of blockchain architecture, smart contracts, Ethereum, Solidity.
Version Control: Git, GitHub
